

CHAPTER IV

CONCLUSION

The result of this study finally answered the writer's problem to know the motives of Joshua and Cornelius Halborough's and their effort to reach their ambition. After getting the findings from analysis in the chapter III, the writer makes the following conclusion:

A problem of life comes because there is a desire in human. When there is a desire on the human life, there is a way to catch it. The desire grows up continuously and makes an ambition itself will grow up. Thus, the ambition comes because there are motives in human such as the desire at two brothers here. Joshua and Cornelius Halborough have a dream in their life. They want to continue their study at one of University. But what they want is became a dream only. They can not continue their study at University and the last they built their ambition to catch up their dream in their life.

People always have ambitions in their life. When people have strong power to catch their willing, they will do all things to catch their willing. The even in Joshua and Cornelius Halborough above build their logic and do by its own. It creates an imagination to build future on the human. It is happened when Joshua and Cornelius Halborough first time to face the fact that they do not get any legacy from his mother. All of legacy will use to his father. It makes them despite because they can not continue their study at one of University. Based on that, they built them imagination and make some image in their future of their life. A high

ambition will decide what kind of action that they may do to catch it. People will choose the best way when they get an ambition to do something and did not consider about the risk of their ambition. The ambition will grow a skill to do all of activity. Joshua builds his ambition and makes him skilled to do his activity. In case, when he knows Cornelius will help his father in that accident, he persuades Cornelius to pull his father out. Joshua knows with his doing in case to catch his dream. That is making Rosa sake.

Love here became the power of catching something important in life. In Joshua and Cornelius Halborough life, they love their younger sister, her name is Rosa. They love her and will make Rosa's life is perfectly. It will make a power in their mind and built ambition to save Rosa and keep it. The way Joshua and Cornelius Halborough build their love in Rosa is good based on their satisfaction only. It means all of Rosa sake is the best one in their life. Although his father was spending the legacy from his mother who uses to his father only, Joshua and Cornelius Halborough keep Rosa's distance between her and her father. In human needs life satisfaction is a response to how life is going according to certain standards, and these standards are provided by a person's values. Joshua and Cornelius Halborough value is at their young sister, Rosa. They did not need their father get close with Rosa. Based on that, they agree to place Rosa to other place and make distance between Rosa and her father. In other words, Rosa sake's is the life satisfaction constitutes of Joshua and Cornelius Halborough.

All in all, ambition is the persistent and generalized striving for success, attainment, and accomplishment. Dream and imagination are the parts of power to

catch the ambition itself. Finally, the ambition happens because there are dream and imagination in human.

The writer hope by this research the reader of this research will consider choosing the good way to catch their willing in their life especially about the ambition itself. The writer also hopes to the next researcher will conduct the better and more detail about ambition related on this study.
