CHAPTER III

RESEARCH METHOD

This study tells about how the researcher collects the data and analyzes this study. The approach of the study will be explained in this chapter.

3.1 Research

In conducting this study, the writer used content analysis research. The data was taken from the movie, which focused on utterances of the members of Spartan-01. As it was stated by Neuendorf that content analysis has a history of more than 50 years of use in communication, journalism, sociology, psychology, and business. Its methods stem primarily from work in the social and behavioral science (Neuendorf, 2002). In addition, the principle could be applied to human production of message, which it refers to all members of Spartan-01 utterances. Firstly, the principle went to apply the types of register which spoken by all members of us army. Thus after analyzing the situational factor the writer also analyzes the function of register.

3.2 Data and Source

The data was taken from the movie entitled lone survivor, which consist of many dangerous and undercover mission, where many registers were uttered by the members of Spartan-01. Lone survivor is a movie that based on true story of redwings squad who were killed in Afghanistan during mission, this movie has 117 minutes length of duration, which consists of many dangerous gunshot and
surviving life. The data of this study is straight from four members of Redwings squad named Spartan-01. They showed the purpose of using register during the mission on movie.

3.3 Instrument

The instruments of this research are the researcher himself. All the activities were done by the personal computer and office software such as modem, dictionary, note, and movie.

3.4 Technique of Data Collection

The technique of data collection, first by using computer, the researcher watches *Lone Survivor* movie. Then, the second is read and rewrite the data script of the movie. After that, the researcher classifies the data, and the last is delete unnecessary data in order to avoid confusions and technical errors.

3.5 Technique of Data Analysis

After collecting data, the writer analyzes the data; first the writer arranges the register which contains of three categories of register such as casual, intimate and consultative register that were taken from the movie entitled “*Lone Survivor*”. Secondly, the writer puts into categories and wrote an analysis by describing the actual events that happen on the movie. The function will be analyzed after knowing the situational factors base on the analysis.
